## Closed Sales

The number of sales transactions which closed during the month

**Economists' note:** Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a month's sales to the amount of sales in the same month in the previous year), rather than changes from one month to the next.

Month	Closed Sales	Percent Change Year-over-Year
Year-to-Date	2,655	10.5%
<b>December 2020</b>	<b>262</b>	<b>35.1%</b>
November 2020	241	38.5%

June 2020	243	3.0%
May 2020	133	-50.0%
April 2020	180	-25.3%
March 2020	222	7.8%
February 2020	170	1.2%
January 2020	144	25.2%
December 2019	194	18.3%

## Cash Sales

The number of Closed Sales during the month in which buyers exclusively paid in cash

**Economists' note:** Cash Sales can be a useful indicator of the extent to which investors are participating in the market. Why? Investors are far more likely to have the funds to purchase a home available up front, whereas the typical homebuyer requires a mortgage or some other form of financing. There are, of course, many possible exceptions, so this statistic should be interpreted with care.

Month	Cash Sales	Percent Change Year-over-Year
Year-to-Date	933	3.4%
<b>December 2020</b>	<b>88</b>	<b>31.3%</b>
November 2020	92	31.4%

March 2020	103	24.1%
February 2020	71	-4.1%
January 2020	66	50.0%
December 2019	67	15.5%

## Cash Sales as a Percentage of Closed Sales

The percentage of Closed Sales during the month which were Cash Sales

**Economists' note:** This statistic is simply another way of viewing Cash Sales. The remaining percentages of Closed Sales (i.e. those not paid fully in cash) each month involved some sort of financing, such as mortgages, owner/seller financing, assumed loans, etc.

Month	Percent of Closed Sales Paid in Cash	Percent Change Year-over-Year

## Median Sale Price

The median sale price reported for the month (i.e. 50% of sales were above and 50% of sales were below)

**Economists' note:** Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area. Keep in mind that median price trends over time are not always solely caused by changes in the general value of local real estate. Median sale price only reflects the values of the homes that *sold* each month, and the mix of the types of homes that sell can change over time.

Month	Median Sale Price	Percent Change Year-over-Year
Year-to-Date	\$400,000	7.8%
<b>December 2020</b>	<b>\$400,000</b>	<b>8.0%</b>

February 2020	\$372,000	13.8%
January 2020	\$406,375	12.9%
December 2019	\$370,500	-4.3%

## Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

**Economists' note:** Usually, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Month	Average Sale Price	Percent Change Year-over-Year

## Dollar Volume

The sum of the sale prices for all sales which closed during the month

**Economists' note:** Dollar Volume is simply the sum of all sale prices in a given time period, and can quickly be calculated by multiplying Closed Sales by Average Sale Price. It is a strong indicator of the health of the real estate industry in a market, and is of particular interest to real estate professionals, investors, analysts, and government agencies. Potential home sellers and home buyers, on the other hand, will likely be better served by paying attention to trends in the two components of Dollar Volume (i.e. sales and prices) individually.

Month	Dollar Volume	Percent Change Year-over-Year
Year-to-Date	\$1.6 Billion	33.8%
<b>December 2020</b>	<b>\$163.3 Million</b>	<b>68.0%</b>
November 2020	\$155.5 Million	105.5%
October 2020	\$174.7 Million	71.8%
September 2020	\$132.6 Million	37.4%

February 2020	\$106.9 Million	38.7%
January 2020	\$72.0 Million	-5.0%
December 2019	\$97.2 Million	17.4%

## Median Percent of Original List Price Received

The median of the sale price (as a percentage of the original list price) across all properties selling during the month

**Economists' note:** The Median Percent of Original List Price Received is useful as an indicator of market recovery, since it typically rises as buyers realize that the market may be moving away from them and they need to match the selling price (or better it) in order to get a contract on the house. This is usually the last measure to indicate a market has shifted from down to up, so it is what we would call a *lagging* indicator.

Month	Med. Pct. of Orig. List Price Received	Percent Change Year-over-Year
Year-to-Date	95.8%	0.9%
<b>December 2020</b>	<b>97.2%</b>	<b>2.3%</b>
November 2020	96.5%	1.4%

May 2020	94.8%	0.1%
April 2020	95.2%	0.2%
March 2020	95.6%	0.5%
February 2020	95.3%	0.3%
January 2020	94.3%	-0.5%
December 2019	95.0%	0.1%

## Median Time to Contract

The median number of days between the listing date and contract date for all Closed Sales during the month

**Economists' note:** Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the month. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.

Month	Median Time to Contract	Percent Change Year-over-Year
Year-to-Date	39 Days	-25.0%
<b>December 2020</b>	<b>19 Days</b>	<b>-53.7%</b>
November 2020	30 Days	-41.2%
October 2020	33 Days	-34.0%
September 2020	25 Days	-56.1%
August 2020	37 Days	-37.3%
July 2020	70 Days	34.6%
June 2020	64 Days	23.1%
May 2020	40 Days	-13.0%
April 2020	37 Days	-22.9%
March 2020	51 Days	-13.6%
February 2020	51 Days	4.1%
January 2020	52 Days	0.0%
December 2019	41 Days	-4.7%

## Median Time to Sale

The median number of days between the listing date and closing date for all Closed Sales during the month

**Economists' note:** Time to Sale is a measure of the length of the home selling process, calculated as the number of days between the initial listing of a property and the closing of the sale. *Median Time to Sale* is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. Median Time to Sale gives a more accurate picture than Average Time to Sale, which can be skewed upward by small numbers of properties taking an abnormally long time to sell.

Month	Median Time to Sale	Percent Change Year-over-Year
Year-to-Date	85 Days	-12.4%
<b>December 2020</b>	<b>65 Days</b>	<b>-17.7%</b>
November 2020	77 Days	-18.9%
October 2020	78 Days	-22.8%
September 2020	67 Days	-38.0%
August 2020	79 Days	-22.5%
July 2020	110 Days	6.8%
June 2020	102 Days	9.7%
May 2020	88 Days	-7.4%
April 2020	84 Days	-8.7%
March 2020	94 Days	-6.9%
February 2020	90 Days	-4.3%
January 2020	104 Days	7.2%
December 2019	79 Days	1.3%

## New Pending Sales

The number of listed properties that went under contract during the month

**Economists' note:** Because of the typical length of time it takes for a sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

Month	New Pending Sales	Percent Change Year-over-Year
Year-to-Date	2,952	17.7%
<b>December 2020</b>	<b>203</b>	<b>69.2%</b>
November 2020	253	43.8%
October 2020	278	36.9%
September 2020	275	41.0%

July 2020	283	31.6%
June 2020	315	57.5%
May 2020	279	21.8%
April 2020	136	-49.8%
March 2020	173	-31.9%
February 2020	251	6.4%
January 2020	253	23.4%
December 2019	120	-7.0%

## New Listings

The number of properties put onto the market during the month

**Economists' note:** New Listings tend to rise in delayed response to increasing prices, so they are often seen as a lagging indicator of market health. As prices rise, potential sellers raise their estimations of value—and in the most recent cycle, rising prices have freed up many potential sellers who were previously underwater on their mortgages. Note that in our calculations, we take care to not include properties that were recently taken off the market and quickly relisted, since these are not really *new* listings.

Month	New Listings	Percent Change Year-over-Year
Year-to-Date	3,126	-1.8%
<b>December 2020</b>	<b>212</b>	<b>7.6%</b>
November 2020	254	17.1%

February 2020	297	-9.7%
January 2020	320	-17.1%
December 2019	197	20.1%

## Inventory (Active Listings)

The number of property listings active at the end of the month

**Economists' note:** There are a number of ways to define and calculate Inventory. Our method is to simply count the number of active listings on the last day of the month, and hold this number to compare with the same month the following year. Inventory rises when New Listings are outpacing the number of listings that go off-market (regardless of whether they actually sell). Likewise, it falls when New Listings aren't keeping up with the rate at which homes are going off-market.

Month	Inventory	Percent Change Year-over-Year
YTD (Monthly Avg)	722	-28.0%
<b>December 2020</b>	<b>490</b>	<b>-45.7%</b>
November 2020	498	-42.4%
October 2020	507	-43.5%
September 2020	538	-38.2%
August 2020	559	-41.0%
July 2020	670	-30.4%
June 2020	712	-28.9%
May 2020	902	-15.8%
April 2020	965	-12.6%
March 2020	969	-12.4%
February 2020	923	-21.6%
January 2020	926	-18.1%
December 2019	902	-4.8%

## Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

**Economists' note:** MSI is a useful indicator of market conditions. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 months of inventory. Anything higher is traditionally a buyers' market, and anything lower is a sellers' market. There is no single accepted way of calculating MSI. A common method is to divide current Inventory by the most recent month's Closed Sales count, but this count is a usually poor predictor of future Closed Sales due to seasonal cycles. To eliminate seasonal effects, we use the 12-month average of monthly Closed Sales instead.

Month	Months Supply	Percent Change Year-over-Year
YTD (Monthly Avg)	4.0	-21.6%
<b>December 2020</b>	<b>2.2</b>	<b>-51.1%</b>
November 2020	2.3	-47.7%
October 2020	2.4	-47.8%

## Closed Sales by Sale Price

The number of sales transactions which closed during the month

**Economists' note:** Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend comparing the percent changes in sales rather than the number of sales. Closed Sales (and many other market metrics) are affected by seasonal cycles, so actual trends are more accurately represented by year-over-year changes (i.e. comparing a month's sales to the amount of sales in the same month in the previous year), rather than changes from one month to the next.

## Median Time to Contract by Sale Price

The median number of days between the listing date and contract date for all Closed Sales during the month

**Economists' note:** Like Time to Sale, Time to Contract is a measure of the length of the home selling process calculated for sales which closed during the month. The difference is that Time to Contract measures the number of days between the initial listing of a property and the signing of the contract which eventually led to the closing of the sale. When the gap between Median Time to Contract and Median Time to Sale grows, it is usually a sign of longer closing times and/or declining numbers of cash sales.
